

Pre/Postnuptial Agreements

Discuss and agree with your partner the need for a prenuptial agreement

Both parties must independently engage a qualified law expert to draft the agreement

Disclose all assets and property fully

Both parties must fully understand the agreement and agree to it willingly*

* A prenuptial agreement cannot be modified once it's been agreed or once you're married. A postnuptial agreement is an alternative if you want to change the terms. This is treated in the same way legally as prenuptial agreements but it is created after marriage.

** If you're entering into a civil partnership, you can have a pre-registration agreement drawn up in the same way.
